

◇Mechanics & Structure Pipe / 机械结构用管

▲ Application:

Includes all kinds of structural pipes used in general structure and mechanical structure, and a large number of structural pipes used in construction, machinery, transportation, aviation, oil exploitation and other industries. Therein, structural stainless steel seamless pipes are widely used in chemical, petroleum, textile, medical, food, machinery and other industries of corrosion-resistant pipes and structural parts and components.

Heavy Wall Pipes

Rectangular & Square Pipes

Stainless Steel Pipes/Tubes

▲ Available Standards & Grades:

- GB/T 8162: 10#, 20#, 45#, Q345A/B/C/D/E;
- DIN 1629: St37.0, St44.0, St55, Ck45;
- EN 10210-1: S235JRH, S275J0H, S275J2H, S355J0H, S355J2H;;
- API SPEC 5L: X52Q-X100Q;
- ASTM A519: 4130;
- ASTM A106: A-106B;
- 20CrMo4, 40Cr, 25Mn2, 40Cr, 30CrMoSiA, 42MnCr52, 20Mn2, 25Mn2, SAE-1030;
- ISO 2938: 20MnV6;
- EN10297-1: E235, E355, 41Cr4, 25CrMo4, 30CrMo4, 34CrMo4, 42CrMo4;
- ASTM A269: TP201, TP304/TP304L, TP316/TP316L, TP321;
- ASTM A312: TP304/TP304P304H, TP310S/TP310H, TP316/TP316L/TP316H, TP321/TP321H, TP347/TP347H

▲ Available Sizes:

- OD: 21.3-930mm; WT: 2.0-65.0mm.
- Length: 3-23m..

▲ Tolerance on Sizes: Follow standards or according to requirements.

▲ Tests: Ultrasonic testing, eddy current testing, magnetic flux leakage testing, magnetic particle testing and other nondestructive testing; Impact test.

If the materials you need are not in the above scope, please contact us:
